## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 and 19 are rejected under 35 U.S.C. 102(b or a) as being anticipated by Wehner et al. 5,118,346, Sanyo Chem. Ind. Ltd. JP-11-092751, Cytec Technology Corp. WO 01/87900, Cytec Technology Corp. CA 2,343,456 or Sumitomo Dow Ltd. JP-173592.
3. See claims 1 and 5-7, column 1, lines 23-30, column 2, lines 17-54, column 3, lines 1-2, column 4, lines 59-66 and Examples 1, 2 and 18-20 of Wehner et al., the Abstract of Sanyo Chemical, claims 1-4 and 10 and Examples 13-16, 18 and 22-24 of Cytec ('900), page 29, lines 17-18 of Cytec ('456) and the Abstract and pages 2-4 (English translation) of Sumitomo Dow Ltd. Applicants' claims are not novel.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1796

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wehner et al. 5,118,346, Sanyo Chem. Ind. Ltd. JP-11-092751, Cytec Technology Corp. WO 01/87900, Cytec Technology Corp. CA 2,343,456 or Sumitomo Dow Ltd. JP-173592, in view of Patel et al. 6,528,572.

7. The primary references have been discussed already. Patel et al. disclose conductive carbon nanotubes in a polymer composition which contains an antistatic agent. It would have been obvious to add the carbon nanotubes to the composition of the primary references, since conductive filler enhances the antistatic effect. It is well settled that it is a matter of obviousness for one of ordinary skill in the art to combine two or more materials when each is taught by the prior art to be useful for the same purpose. In re Kerkhoven, 205 USPQ 1069, 1072 (CCPA 1980).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 6:10 a.m.-4:40 p.m. Tuesday-Friday.

Art Unit: 1796

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
